

“DELIVERING THE FUTURE OF MOBILE & WIRELESS COMMUNICATIONS”

Conference and Partner Brokerage Event

10th October 2007
Glasgow, Scotland

The Vision

The future of Mobile and Wireless Communications will consist of different devices, numerous services, co-existing business models, different connectivity modes, and cross-industry interfaces”. – source: “e-Mobility” European Technology Platform, 2006.

Overview

As part of the EPISTEP project, which connects SME's to the European Technology Platforms **under** the European Union's Framework 7 Programme, this event provides technology developers, research institutes and other parts of the value chain the opportunity to meet and develop business opportunities with key players from across Europe. The one day event will inform participants of the challenges of changing user requirements, highlighting areas as diverse yet interlinked as;

- Enhanced network services
 - Securing converged networks
 - Context based applications – presence, status, relevance etc
 - Intuitive user interfaces/Portability
 - Short range wireless networks
 - Push and pull services
-

Opportunity

This event will provide the opportunity to;

LEARN where members of the “e-Mobility” European Technology Platform; companies such as Ericsson, Telefonica Moviles and Nokia, believe European R&D in the mobile and wireless sector will be going in the next 10 – 15 years.

UNDERSTAND how the EPISTEP project can benefit you by connecting you further to the e-Mobility platform and to a number of companies across **15** European Union countries.

BUILD relationships with key sector players who are interested in and preparing collaborative research proposals for the EU's FP7 Research and Development Programme.

DELIVER tangible business opportunities with companies, including multinationals, by booking meetings with relevant partners based on pre-published profiles.

Guest speakers and Participants in the Partner Brokerage event will include:

- Fiona Williams, Head of Research, Ericsson GmbH
- Peter Walters, UK DTI's National Contact Point for ICT
- Other significant mobile and wireless multinational companies

This event is free of charge.

Where

Your host for the event will be the award winning incubator, Hillington Park Innovation Centre home of Scotland's Wireless Innovation project (www.innovationcentre.org/wireless) and some of Scotland's most innovative, knowledge intensive, young companies. This event is run in partnership with the IRC Scotland (www.ircscotland.net) team at Targeting Innovation.

Hillington Park Innovation Centre is located a few miles from Glasgow Airport, which is located to the West of the city.
