## FP7 Call 5 Collaboration – Future Networks

17<sup>th</sup> June 2009

**BERR Conference Centre  
1, Victoria Street, London**

A Workshop organised by the Digital Communications and Cyber Security KTN's, together with the National Contact Point for Framework, Programme 7, and held in association with the Grid Computing Now! and Location and Timing KTN's

**To apply for a free registration click below**

<http://www.fp7uk.co.uk/site/Events/default.cfm>

The European Commission will launch its Fifth Call for ICT proposals on 31 July 2009. This will include **130 M€** for research into **Objectives “Network of the Future and “Future Internet Experimental Facility & Experimentally-Driven Research”**.

The workshop is intended for those organisations considering submitting proposals in FP7 Call 5 that opens in July 2009

Presentations from the European Commission will enable delegates to understand the scope of the call in detail – an essential for success. Requirements for partnering and writing winning proposals will be addressed. These elements together with a keynote speaker from the **eMobility** technology platform to provide a perspective on the Future Internet and networking elements make this an event not to be missed.

**Participants will also be able to register their intent and ideas in preparation for a follow up workshop looking at specific outline proposals**

The full day event will also include opportunities to discuss individual ideas with experts from the KTN's as well as advice on forming consortia.

*The Digital Communications Knowledge Transfer Network has been established by an industry-led group of leading players, with funding from the Technology Strategy Board. It seeks to bring competitive advantage to the UK by promoting collaboration and knowledge sharing between the users and providers of Digital Communications, and by helping to drive innovation in the sector.*
